WORKPLACE SAFETY INITIATIVES

OFFICE ERGONOMICS PROGRAMME

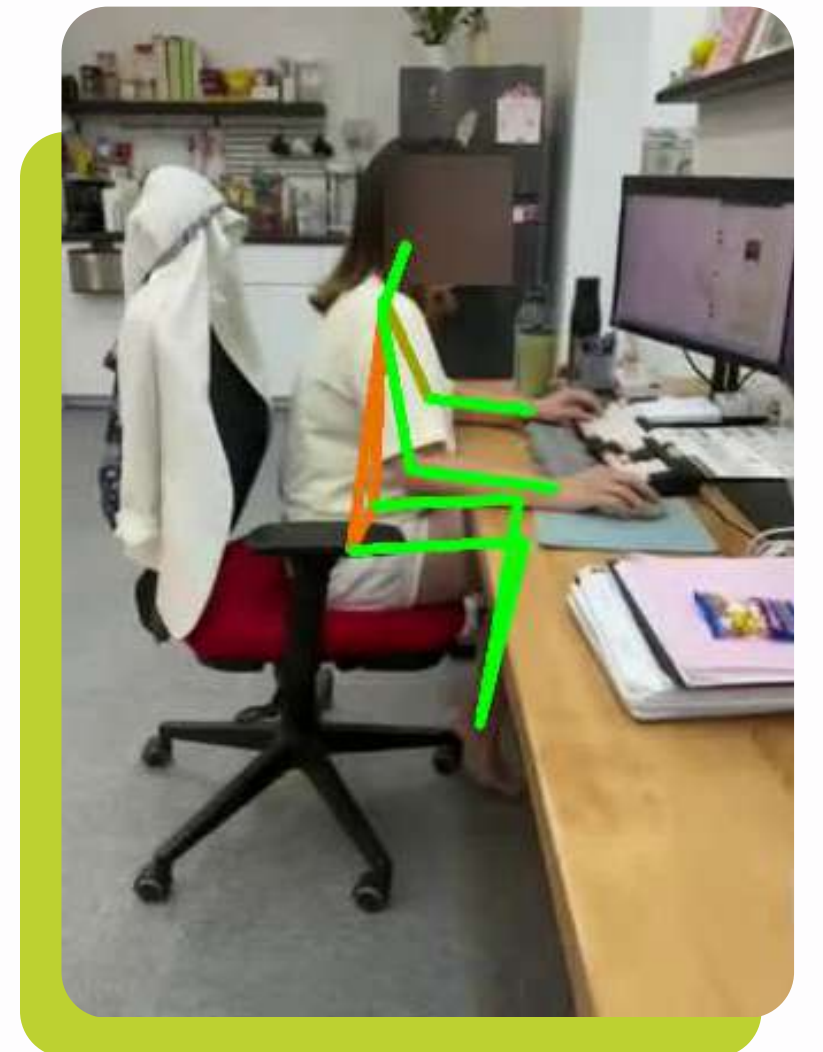

Our Flagship Programme | Revolutionising ergonomics in the workplace

Our Ergonomics Programme whereby **proactive measures** like **workdesk adjustments**, **tailored exercise classes** and **1-on-1 physiotherapy** consultations to enhance employee well-being and prevent work-related injuries.

Who is this for?

This programme is suitable for **desk bound** or **sedentary job functions**.

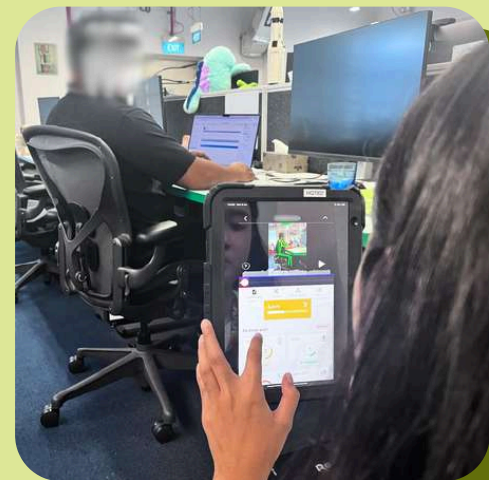

WORKPLACE SAFETY INITIATIVES

OFFICE ERGONOMICS PROGRAMME

Module 1 Ergonomics Assessment

Our trained ergonomics associates will analyse employees' occupational postures using a customised video assessment that detects even the slightest changes in movements.

Module 2 Review & Adjustments

After Module 1, our ergonomic associates will perform one-to-one review sessions with employees to improve their work postures by tailoring their fixtures or movements accordingly.

Module 3 Workshops & Classes

Employees that may require further body conditioning will undergo a targeted group workshop and exercise programme conducted by our physiotherapist.

Module 4 Physiotherapist Consultation & Treatment

Employees with chronic postural issues or musculoskeletal disorders will be directed to individualised physiotherapy consultations provided onsite.

WORKPLACE SAFETY INITIATIVES

ERGONOMICS RISK ASSESSMENT

Our Flagship Programme | Prioritising **safety**, Mitigating **risk**.

Our WRA programme focuses on **proactive risk assessment** for **high-risk roles**, including work-at-height, confined spaces, lifting/transportation, and production line operations. We conduct thorough assessments to identify and mitigate hazards, ensuring employee safety and well-being.

Who is this for?

Job functions with **high risk propensity**, for example, working at heights, in confined spaces, lifting and manual labour.

WORKPLACE SAFETY INITIATIVES

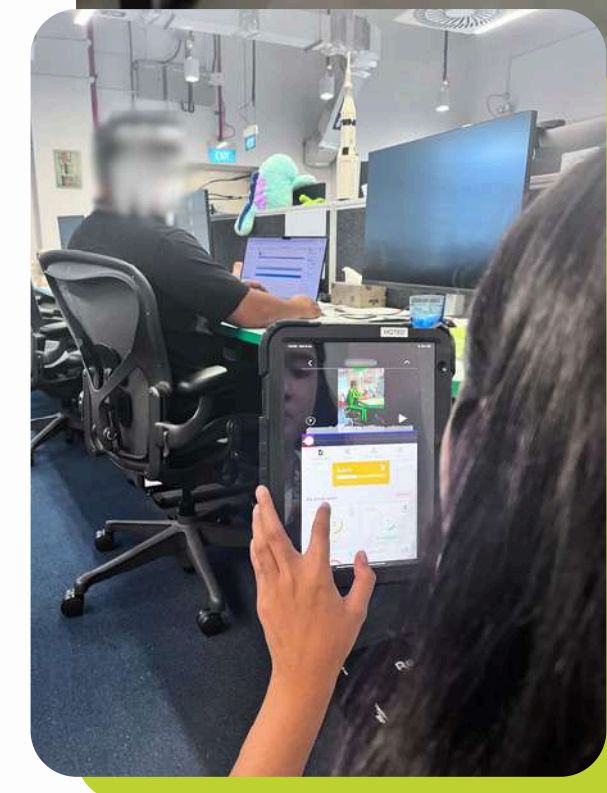

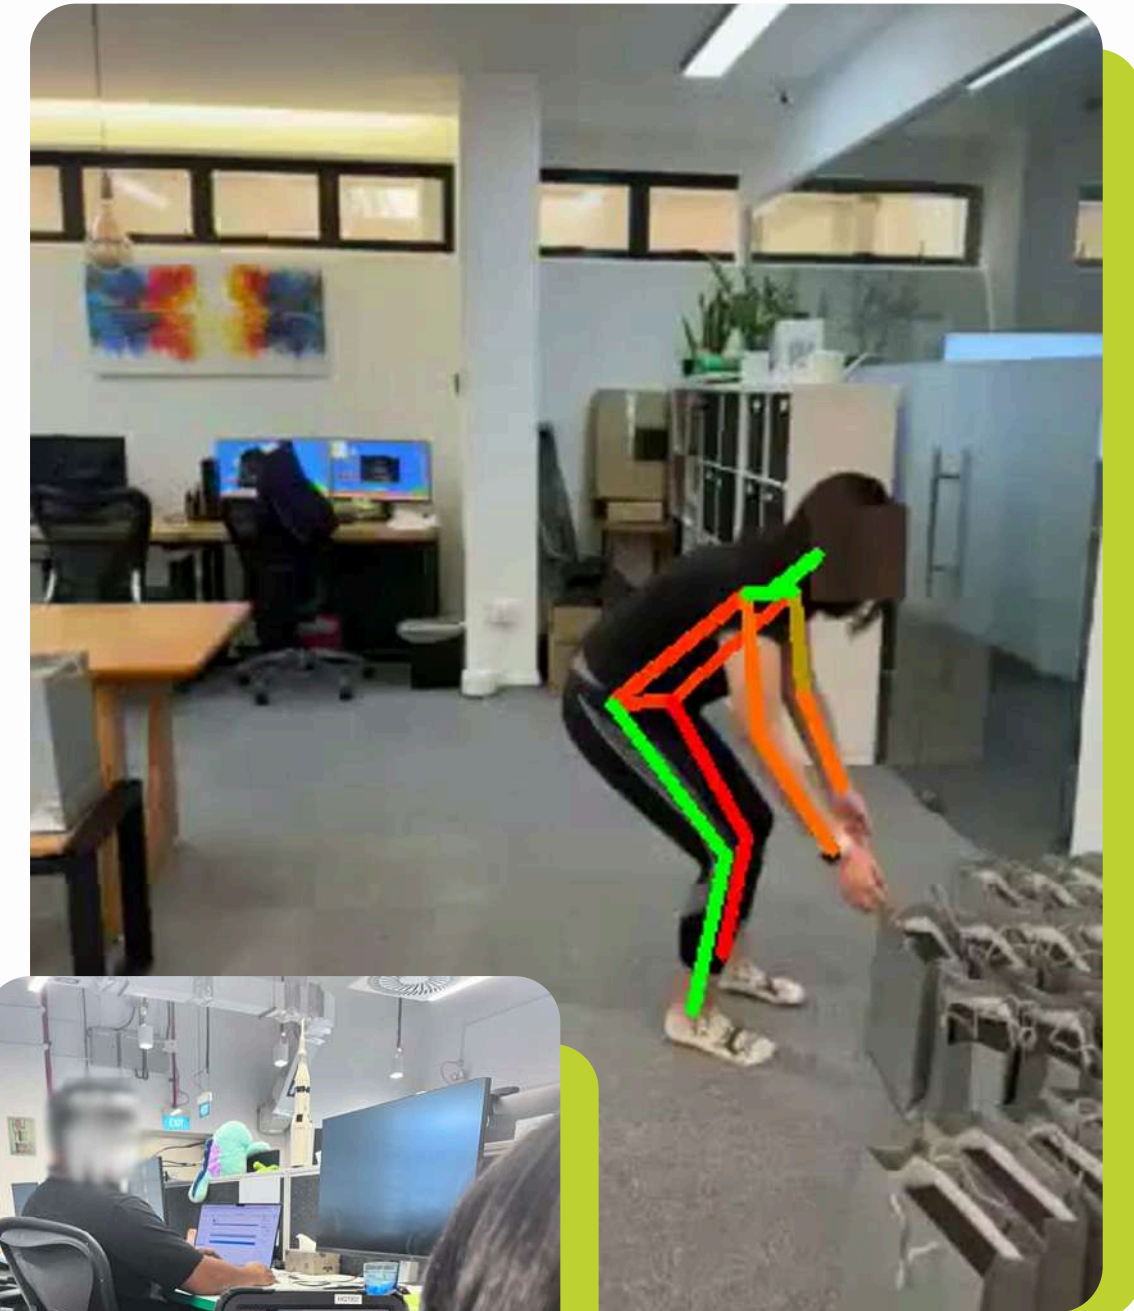

ERGONOMICS RISK ASSESSMENT

Our Flagship Programme | Prioritising **safety**, Mitigating **risk**.

Motion Analysis & Data Collection

Our ergonomic risk assessment solution utilises **motion analysis software** to capture and analyze employee movements in real-time. By tracking key body postures and movements, we can identify potential ergonomic hazards with **greater accuracy** and **objectivity**.

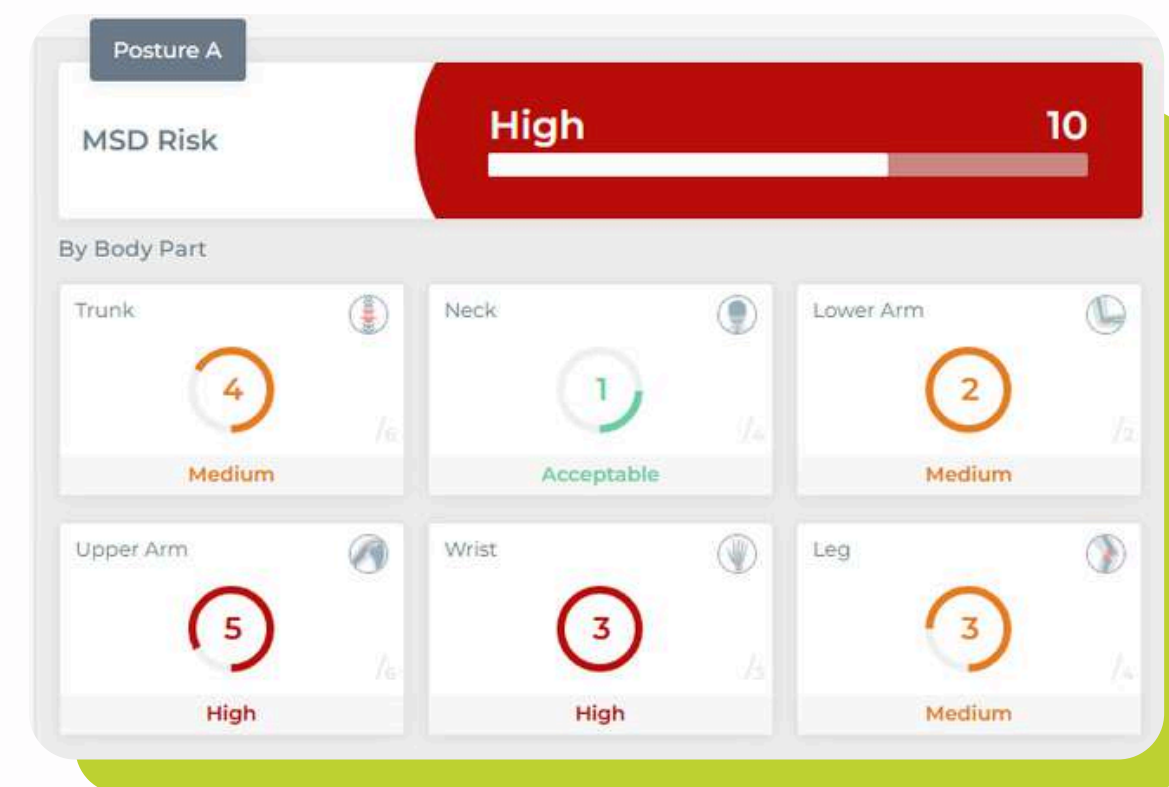

WORKPLACE SAFETY INITIATIVES

ERGONOMICS RISK ASSESSMENT

 Our Flagship Programme | Prioritising **safety**, Mitigating **risk**.

Data Analysis of Ergonomic Risks

We adopt the use of **validated ergonomic assessment** tools - Rapid Upper Limb Assessment (RULA) and Rapid Entire Body Assessment (REBA) to evaluate the risk of musculoskeletal disorders (MSD) in specific job functions.

WORKPLACE SAFETY INITIATIVES

ERGONOMICS RISK ASSESSMENT

 Our Flagship Programme | Prioritising **safety**, Mitigating **risk**.

Comprehensive Reporting & Recommendations

Through detailed observations and analysis, **quantifiable risk scores** were determined for each workstation assessed. These scores provide **objective data** to prioritise interventions and implement targeted solutions to mitigate ergonomic hazards.

WORKPLACE SAFETY INITIATIVES

ERGO SAFETY CAMPAIGNS

Designed to promote **safety awareness** and prevent incidences in the workplace.

Easy Desk Stretches

Through simple stretches guided by ergonomic specialists, participants learn to ease tension, and prevent common office issues like neck stiffness, back pain, and eye fatigue.

Ergo Chair Fit & Posture Check

Explore core ergonomic principles through hands-on demonstrations of posture alignment, desk setup, and equipment use. Learn how good ergonomics improves comfort, and efficiency.

Foot Care at Work

Gain insights from podiatrists on detecting early foot conditions, and learn how proper footwear can reduce strain, improve posture, and enhance overall ergonomic safety and comfort at work.

Mindful Ergo for Focus

Discover how mindful posture resets and breathing techniques can relieve tension, boost focus, and improve comfort at work through simple, everyday ergonomic habits.
