

TACKLING SIF PROMOTION CAMPAIGN FY26-27

Presented By

FS TEAM

Strategic Context

Key Drivers

Our organization has shifted its safety KPIs to prioritize Serious Injury & Fatality (SIF) prevention. This strategic change reflects our commitment to eliminating the most severe workplace incidents. SIF events in our operational areas have underscored the critical need for immediate, focused action.

These incidents serve as urgent reminders that we must strengthen our safety culture across all operations. By proactively addressing high-risk activities and behaviours, we can protect our workforce and prevent life-altering injuries. This campaign is our response to that imperative.

Possible New SIF-focused KPI framework

Safety culture strengthening

Safety Campaign
FY26-27

The Tackling SIF Promotion Campaign FY26-27 addresses the urgent need to prevent serious injuries and fatalities across SATS FS operations. Through targeted interventions and interactive engagement, we aim to build lasting safety awareness and behavioral change among our workforce.

FY26-27

Target Audience & Scale

Our campaign primarily targets Catering and Food Services operations, reaching over 1,000 employees across multiple Singapore sites. This comprehensive approach ensures safety messaging reaches all frontline workers in high-risk operational environments.

Coverage spans diverse operational environments including kitchens, loading docks, and production areas. Tailored messaging addresses the unique hazards each team faces daily, ensuring relevance and maximum engagement across all workforce segments.

Campaign Structure

Interactive Stations Overview

Three engaging stations targeting key SIF risk areas through hands-on learning experiences and real incident case studies.

Manual Handling

Station 1 focuses on manual handling risks, including struck-by and struck-against hazards during load operations. Features hands-on demonstrations of load behavior during loading and unloading activities.

Working with MHE

Station 2 addresses MHE safety, covering collision hazards at blind corners, loss of control scenarios, and falling load risks. Interactive vendor demonstrations will highlight crush injury prevention.

Machinery Equipment

Station 3 covers machinery equipment hazards, teaching employees to identify pinch points, understand mechanical risks, and recognize proper safeguards. Hands-on activities reinforce hazard awareness.

Safety Campaign

FY26-27

Three interactive stations designed to engage employees through hands-on activities and real incident learnings. Each station targets specific SIF risk areas identified in our operational environments, delivering practical safety knowledge across all shifts.

3 STATIONS

Delivery Approach

Our campaign delivery strategy is modeled on the approach, leveraging external vendor expertise to maximize engagement and impact. Interactive demonstrations and booth activities will be deployed across all shifts to ensure comprehensive workforce coverage.

The program is specifically designed for accessibility to our shift-based operational workforce. Through face-to-face interaction and hands-on activities, employees will actively participate in safety learning rather than passively receiving information, driving deeper understanding and behavior change.

How We Will Deliver

External vendor engagement

Interactive booth demonstrations

Hands-on activities for active learning

Face-to-face engagement

Safety Campaign

FY26-27

Station 1 – Manual Handling

Theme

"Understand the risks. Build safe habits." This station focuses on struck-by and struck-against hazards that occur during load handling operations. Participants will learn to recognize danger zones and develop awareness of how loads can shift unexpectedly during movement, emphasizing the importance of proper positioning and situational awareness.

Hands-On Demo

Interactive activity demonstrating load behavior during loading and unloading operations. Participants experience firsthand how loads shift, tip, and move unpredictably, building muscle memory for safe handling techniques and proper body positioning.

Key Focus

Struck-by/Struck-against Prevention

Manual handling accounts for a significant portion of workplace injuries. This station equips employees with practical skills to identify risks before they become incidents. Through hands-on learning, workers develop the instincts needed to protect themselves and colleagues during daily operations.

Sample Video

STATION 1

Station 2 – Working with MHE

Theme

"Stay alert around MHE. Prevent collisions." This station focuses on raising awareness about the serious risks associated with Material Handling Equipment operations. Participants will learn to recognize collision hazards at blind corners and understand the dangers of loss of control situations.

Interactive Demo

Hands-on activity featuring an interactive demonstration proposed by the vendor. Participants will experience realistic scenarios involving MHE collision risks. The demo reinforces safe behaviors through practical engagement and helps build lasting awareness of hazard recognition.

Key Focus

Struck-by MHE

Material Handling Equipment (MHE) operations require constant vigilance. This station uses real incident learnings to demonstrate how collisions occur and what protective measures can prevent serious injuries in your workplace.

Sample Video

STATION 2

Sample Video

Station 3 – Working with Machinery Equipment

Theme

"Know the hazards. Protect yourself." This station focuses on understanding mechanical hazards present in machinery operations. Participants will learn to identify dangerous pinch points, rotating parts, and moving components that pose serious injury risks in daily operations.

Interactive Demo

Hands-on demonstration proposed by external vendor showcasing real machinery hazard scenarios. Participants will practice identifying danger zones, proper lockout/tagout procedures, and safe operating distances from equipment with highlighted hazard zones.

Key Focus

Caught In between and Pinch Points

Station 3 empowers employees to recognize and avoid machinery-related hazards through practical, hands-on learning. Understanding safeguards and protective measures is essential for preventing serious injuries in operational environments.

STATION 3

Implementation Scope

Total engagement spans 7 days across 5 key operational sites in Singapore. This comprehensive rollout ensures maximum reach to our shift-based workforce, with dedicated time allocated based on site size and operational complexity.

Site allocation breakdown:

- SATS C1 – 2 days
- SATS C2 – 2 days
- SFS – 2 days
- PI – 0.5 day
- CF – 0.5 day

How We Measure

Participation and completion rates tracked through digital survey forms distributed post-campaign. Survey data will measure engagement levels, confidence improvements, and safety awareness to guide future campaign iterations.

RFQ Exercise

Following SPS's recommendation to adopt a direct sourcing approach, we invited nine vendors to participate in the exercise.

Two vendors responded and submitted quotations for evaluation.

**ANJOU
HEALTH**

\$34,880

The logo for Anjou Health features the word 'Anjou' in a green, stylized font, followed by 'Health' in a green, sans-serif font, and the Chinese characters '瑞恆' in a green, sans-serif font.

**MONKEY
CREATIVE**

\$35,255

The logo for Monkey Creative features the word 'monkey' in a green, lowercase, sans-serif font, with 'CREATIVES' in a smaller, green, uppercase, sans-serif font below it.
